

# MAP Growth Testing

01/11/22

Dear Parent,

During the week of January 17th, 2022, your child will take a MAP® Growth™ test from NWEA® on a computer or tablet. MAP Growth scores help teachers check student performance by measuring achievement and growth. Teachers use results to tailor classroom lessons and set goals for students.

MAP Growth tests are unique, and it adapts to your child's responses to measure your child's skill level. If your child answers a question correctly, the next question is more challenging. If they answer incorrectly, the next one is easier. These results will provide a more complete picture of what your child knows and is ready to learn—whether it is on, above, or below their grade level.

Since MAP Growth tests provide immediate and accurate information about your child's learning, it's easy for teachers to identify students with similar scores that are generally ready for instruction in similar skills and topics, and then plan instruction accordingly.

MAP Growth reports also provide typical growth data for students who are in the same grade, subject and have the same starting performance level. Each school year, students in grades Young Fives/Kindergarten through 8th grade take the tests three times a year.

Please see the "What Parents Need To Know About Map Testing From Home" document to help you and your child have a positive testing experience.

We are truly excited to focus on your child's individual growth and achievement. For more information about MAP Growth, visit [NWEA.org/familytoolkit](https://www.nwea.org/familytoolkit).

Sincerely,

Mrs. Langlois  
Mrs. Flemming  
Mrs. Altman  
Mrs. Hentkowski  
Mrs. Purol  
Mrs. Ehrke
